

Project Testing Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Item	Detail
Project	Automating Standard Laptop Orders with Flow Designer
Platform	ServiceNow (Flow Designer, Service Catalog)
Phase	6 - Project Testing
Purpose	Verify the solution meets the requirements.

1. Test Objective

Confirm that ordering and approving a Standard Laptop automatically creates one Catalog Task with the correct short description, description and Hardware assignment group, and that nothing is created in the cases where it should not be.

2. Test Environment and Data

- ServiceNow test or development instance with the flow (or scripted rules) active.
- Standard Laptop item under Service Catalog > Hardware.
- Hardware group exists; an approver is available.
- Test orders: quantity 1, quantity 1, quantity 2 (used by the automated script).

3. Test Cases

ID	Scenario	Steps	Expected result	Req.
TC01	Place order	Service Catalog > Hardware > Standard Laptop > Order Now	Request and Requested Item are created	FR1, FR2
TC02	Approval requested	Open request > Approvers	Approval record exists in Requested state	FR2
TC03	No task before approval	Open RITM > Catalog Tasks before approving	No configuration task yet	FR3
TC04	Approve request	Right-click approval > Approve	Approval state is Approved	FR3
TC05	Task created	Open RITM > Catalog Tasks	One task is present	FR3, FR8, FR10
TC06	Short description	Open the task	Laptop needs to be configured	FR4
TC07	Description	Open the task	Laptop needs to be configured	FR5
TC08	Assignment group	Open the task	Assignment group is Hardware	FR6
TC09	Rejected request	Order and reject the approval	No configuration task is created	FR3
TC10	Other catalog item	Order a different item and approve	No Standard Laptop task is created	FR9
TC11	Flow attached	Maintain Items > Standard Laptop > Process Engine	Standard Laptop Task flow is listed	FR7

4. Test Execution Record

Record the outcome of each run below. Results are filled in when the tests are executed in the target instance.

ID	Actual result	Status (Pass / Fail)	Tester / Date	Notes
TC01				
TC02				
TC03				
TC04				
TC05				
TC06				
TC07				
TC08				
TC09				
TC10				
TC11				

5. Automated Check

Script **03_test_order_and_verify.js** places an order for each row in the test data, approves it and checks the task. A full pass is reported as **RESULT: 3/3 passed**.

6. Defect Log

Defect ID	Description	Severity	Status

7. Exit Criteria

- All Must-have test cases pass.
- No open high-severity defects.
- Owner accepts the results.
