

Project Documentation Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Item	Detail
Project	Automating Standard Laptop Orders with Flow Designer
Platform	ServiceNow (Flow Designer, Service Catalog)
Phase	7 - Project Documentation
Purpose	Provide the user, admin and support documentation for the solution.

1. Document Index

Document	Content
Phase 1 - Brainstorming & Ideation	Problem, ideas and selected approach
Phase 2 - Requirement Analysis	User story, requirements, acceptance criteria
Phase 3 - Project Design	Architecture, process flow, configuration
Phase 4 - Project Planning	Work breakdown, roles, risks
Phase 5 - Project Development	Build steps and configuration
Phase 6 - Project Testing	Test cases and execution record
Phase 8 - Project Demonstration	Demo script and checklist

2. User Guide: Ordering a Standard Laptop

- 1 Open Service Catalog and select **Hardware**.
- 2 Click **Standard Laptop**, then **Order Now**.
- 3 Note the request number shown on the order status page.
- 4 Wait for approval. Once approved, the Hardware team receives a configuration task automatically.

3. Approver Guide

- 1 Open the request and go to the **Approvers** section.
- 2 Right-click the approval record and choose **Approve** (or reject).
- 3 After approval, the Hardware configuration task is created automatically.

4. Hardware Team Guide

- Tasks arrive assigned to the **Hardware** group with the short description *Laptop needs to be configured*.
- Open the task from your group queue, configure the laptop and close the task.

5. Administrator Guide

Topic	Where / how
View or edit the flow	All > Flow Designer > Standard Laptop Task

Topic	Where / how
Change task text or group	Edit the Create Catalog Task action, then Save and Activate
Attach or detach the flow	All > Maintain Items > Standard Laptop > Process Engine
Change Hardware team members	Update the Hardware group membership
Disable the automation	Deactivate the flow

6. Troubleshooting

Symptom	Check
No task after approval	Flow is active; attached to the item; approval is Approved.
Two tasks per order	Another workflow or flow is also attached to the item.
Task has no group	Hardware group exists and is selected in the action.
Task created before approval	Add the approval step before Create Catalog Task.

7. Maintenance and Roll-back

- Review the flow after ServiceNow upgrades.
- To roll back, deactivate the flow or remove it from the Process Engine tab.
- If the scripted option is used, run the cleanup script to remove the business rules.

8. Glossary

Term	Meaning
Flow Designer	ServiceNow low-code tool for building automations
Catalog Task	Work item created from a catalog request
RITM	Requested Item; the ordered item within a request
Process Engine	Tab on a catalog item that sets its automation
