

Project Demonstration Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Item	Detail
Project	Automating Standard Laptop Orders with Flow Designer
Platform	ServiceNow (Flow Designer, Service Catalog)
Phase	8 - Project Demonstration
Purpose	Show the working solution to stakeholders.

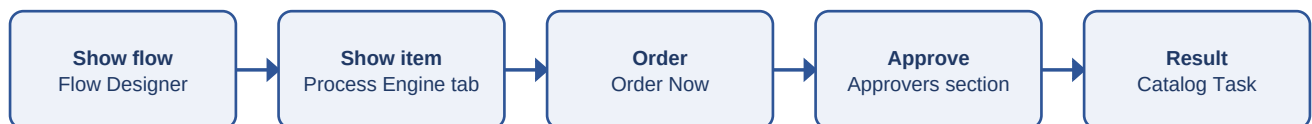

1. Demo Objective

Show that a Standard Laptop request is turned into a configuration task for the Hardware team automatically, with no manual follow-up.

2. Before You Start

- Flow **Standard Laptop Task** is active and attached to Standard Laptop.
- Hardware group exists.
- Approver is ready and logged in (or the presenter can approve).
- Browser tabs open: Flow Designer, Service Catalog.

3. Demo Flow

4. Demo Script

Step	Action	What to say / show	Expected result
1	Open Flow Designer > Standard Laptop Task	Explain trigger and Create Catalog Task action	Flow shown as Active
2	Open Maintain Items > Standard Laptop > Process Engine	Show the flow is attached	Standard Laptop Task listed
3	Service Catalog > Hardware > Standard Laptop > Order Now	Place the order	Order status page with request number
4	Open the request number	Show the Approvers section	Approval record in Requested state
5	Right-click the approval > Approve	Approve as the approver	Approval state Approved
6	Open the Requested Item > Catalog Tasks	Open the new task	Short description: Laptop needs to be configured
7	Check assignment group	Point out the group	Assignment group: Hardware

5. Key Messages

- No one has to remember to raise the configuration task.
- The Hardware team gets the work immediately and in the right queue.
- Users wait less; IT spends less time on manual hand-offs.

6. Likely Questions

Question	Answer
Does it run for every catalog item?	No, only for Standard Laptop.
What if the request is rejected?	No configuration task is created.
How do we change the task text or group?	Edit the Create Catalog Task action in Flow Designer, then Save and Activate.
Can it be switched off?	Yes, deactivate the flow or remove it from the item.

7. Screenshot Checklist

- Flow properties and trigger.
- Create Catalog Task action settings.
- Active flow status.
- Process Engine tab with the flow attached.
- Order status page and request number.
- Approval record after approval.
- Catalog Task with short description and Hardware group.

8. Wrap-up

By automating standard laptop procurement with Flow Designer, the solution removes manual overhead, ensures laptops are configured promptly, reduces user wait times and improves resource use in the IT department.
